

**NEW PALTZ CENTRAL SCHOOL DISTRICT BOARD OF EDUCATION  
RESOLUTION AGAINST WASTING FOOD AND TAXPAYER MONEY**

**WHEREAS**, the New Paltz Central School District’s Board of Education (“Board”) is committed to maintaining the fiscal health of the New Paltz Central School District (“District”) and the nutritional health of our students; and

**WHEREAS**, the Board is in agreement with the overall sentiment of the new USDA standards aimed at aligning school meals with the latest nutrition science, as well as the importance of serving students in need of free and reduced price breakfast and lunch; and

**WHEREAS**, the Board believes in the importance of encouraging students to learn about and adopt healthy eating habits; and

**WHEREAS**, all students receiving breakfast or lunch at school are now mandated to take a half-cup of fruit or vegetables, whether they plan to eat them or not as per the USDA’s *Standards for Meals Selected by the Student (Offer versus Serve)*; and

**WHEREAS**, a significant number of our students are choosing to throw away instead of eating fruits or vegetables they are mandated to take and this was substantiated in the national School Nutrition Association’s 2014 report which stated “A recent study in *Public Health and Nutrition* found that this mandate to serve results in a nearly 100% increase in wasted fruits and vegetables or \$3.8M thrown into the trash each day”; and

**WHEREAS**, our federal and New York State governments have already implemented an unprecedented number of new unfunded mandates that have placed significant financial pressure on the District; and

**WHEREAS**, the District is being forced to involuntarily expend taxpayer money to meet this under-funded program instead of being permitted to autonomously listen to and balance student needs and tastes; and

**WHEREAS**, the new USDA requirements are anticipated to cost our food service program an additional \$85,000 to \$105,000; and

**WHEREAS**, the anticipated additional revenue of \$0.06 per meal from participating in the program would only amount to \$8,100 per year for the District or less than 10% of the annual cost of the program; and

**WHEREAS**, the Board is in agreement with the New York State School Boards Association’s statement set forth in their 2014 National Advocacy Institute Issue Brief discussing local school districts need for flexibility to operate a school lunch and breakfast programs to give them more local control; and

**WHEREAS**, the Board is also concerned with desensitizing students to concerns about responsible solid waste management practices and its broader impacts on our environment; and

**THEREFORE, BE IT RESOLVED** that the New Paltz Central School District Board of Education declares its strong opposition to the elimination of local autonomy in the management of the District’s school nutrition program; and

**BE IT FURTHER RESOLVED**, the Board seeks immediate remediation from requirements forcing fruit and vegetables on students leaving the District to absorb the unintended financial consequences of these standards.

BOE Adopted 3/18/15
